I am a full stack web developer eager to begin a new career after graduating from the UNC Chapel Hill coding bootcamp. In addition to the programming skills I attained during the bootcamp, I also improved my ability to acquire and integrate new information in my project designs and implementation. Through my previous experience I have learned to work well in a group setting or individually, I am detail oriented, and I can keep to a given schedule to accomplish tasks.

Technical Skills

Frontend: HTML, CSS, JQUERY, Javascript, Bootstrap, Tailwind
Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars

Projects

Social Rolls | https://github.com/KrisSmith7/roll-initiative | https://socialrolls.herokuapp.com/
Role: Back-end development and general site functionality
- An app to keep track of D&D character and campaigns and talk to your fellow enthusiasts
- I worked on both server and client side post functionality to allow users to add a post to the site, as well as edit and delete your own posts and allow users to add comments. I also helped with the functionality to add and update characters and campaigns to keep track of users games
- **Tools/Languages**: MERN stack, JavaScript, Tailwind/Bootstrap

Game Corner | https://github.com/kerbunker/game-collection | https://afternoon-reef-79835.herokuapp.com/
Role: Server side functionality and assist with handlebars
- A place to keep track of your board game collection and organize it into different lists
- Create lists and add board games to the lists as well as find details about the games pulled from an external API. I worked on the majority of the lists and games functionality
- **Tools/Languages**: Express, SQL, Handlebars, board game atlas API
